

ALLERGY RINSE

FRONT LOAD WASHERS

FEATURE **ALLERGY RINSE**

The Speed Queen front load washer offers Allergy Rinse as an option for a premium rinse.

ADVANTAGE **BETTER QUALITY**

The Allergy Cycle will perform two additional full rinse routines when selected. Each routine is in addition to the two rinses already included in a standard wash cycle.

BENEFIT **LONGER LIFE; PEACE OF MIND**

The Allergy Rinse offers the user peace of mind that all unwanted soaps and chemicals are removed from clothing. This feature is especially appealing to users who have sensitive skin or specific allergies to detergent, fabric softener, or bleach.

EXAMPLE

A user has a child with sensitive skin. The user should add the load of clothing to the machine and select the appropriate cycle, water temp, and soil level for their fabric type. The recommended detergent portion should then be added to the dispenser. The Allergy Rinse should then be selected as a cycle modifier. This selection will add two additional rinses to the cycle to ensure that all detergent is removed from the load to protect the child's sensitive skin.
